

## VL8 / VL24 LED Video Lights

### Compact, Powerful, Feature Rich Underwater Lighting

New to the Gates 'bulletproof' underwater imaging lineup, the Sub Aqua Imaging Systems **VL8** and **VL24** Underwater Video Lights will appeal to the broad range of Gates clients from recreational divers to underwater cinematographers. The extensive underwater lighting expertise of Sub Aqua Imaging Systems is brought to bear in a collaborative effort with Gates, and represents a quantum leap in underwater video lighting technology. The **VL8** throws a remarkable 2000 lumens of illumination, while the **VL24** big brother is rated at *over 6000 lumens* – all in a single, self contained package that will un-tether the professional from surface supplied lighting. Available in tungsten and daylight color temperatures, the VL series LED lights have an evenly dispersed 100° Effective Beam Angle that will satisfy the most demanding wide angle shooters. And the neutral buoyancy of the VL-series will delight the DSLR video shooter.

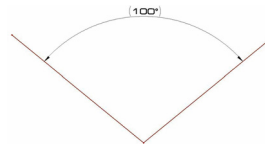

The VL series lights carry Gates support and backing with a 2 year warranty on parts/labor and 6 months on batteries – the best available in the industry. Reliability, durability, dependability – the Gates hallmark for over 40 years.

### Key Features

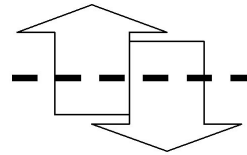

**Powerful illumination** of 2000 and 6000 lumens for the VL8 and VL24, respectively.

**Uniform and Powerful 100° Effective Beam Angle** covers the widest shots.

**Durable**, "Bulletproof" machined aluminum, black type III 'hard' anodize finish, and sealed with a nickel-acetate process.

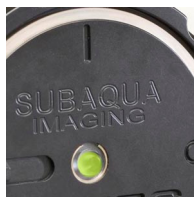

**Neutrally buoyant** for minimal impact to your perfect system trim.

**Tungsten and Daylight** color temperatures are available for your shooting preference.

**SUBAQUA IMAGING SYSTEMS**

**SAIS technology** means powerful light output in a small package.

**Burn Times** of 1 hour at full power, and > 2 hours at half power. Simple, easy to see battery life indicator.

**2-Year / 6 months Warranty.** Only Gates offers a 2-year renewable warranty on all imaging equipment and 6 months on batteries.

## **VL8 / VL24 Specifications (Preliminary)**

---

\* **Burn Time**

- \* Full Power: 1 hour
- \* Half Power: > 2 hours

\* **Dimensions**

- \* **VL8** 5.6 Ø x 5.5 L in / 142 Ø x 139 L mm
- \* **VL24** 5.6 Ø x 5.5 L in / 142 Ø x 139 L mm

\* **Warranty**

- \* 2 Years *renewable* on Light Heads / Power Modules.
- \* 6 months on batteries

\* **Light Output**

- \* **VL8** >2000 Lumens (Daylight version)
- \* **VL24** >6000 Lumens (Daylight version)

\* **Construction**

- \* Machined Aluminum w/ Type III 'hard' anodize & Nickel Acetate Seal. Stainless steel hardware.

\* **Weight**      **Dry**                      /      **Underwater**

- \* **VL8**              1.5 lbs / 0.7 kg      /      Neutral
- \* **VL24**            4lbs / 1.8 kg        /      Neutral

\* **Effective Beam Angle**

- \* 100°

\* **Depth Rating**

- \* 450 feet / 137 meters
- 

**Don't Take a Chance....Take a *Gates!***
